שׁוּ	שׁוּבָה	Peedal, Dallaape, Dallapoy	Tale of Cups, The Cup game	Memory game which can be played with 101 (65) marked “cups”, or cards. Each person starts with taking 4 cups, and hide them from their opponents. Then they play each two cups at the time, showing the other players what they are playing. If switching a cup, must use that cup. Best hand of the moment wins and gives one point, which balances towards zero. There should always be an unplayable number of cups left, and they can reduce the points of whoever won. True cups trump wild cups. Wild cups always give the best outcome. Best hands are: 5 different, 1 only, 5 same, 4 different, 4 same, 3 different, 3 same, 2 pairs, 2 same. Not everyone agrees on those and it can get pretty rowdy. The writer's impression of what magic is makes its use of the logograph vary. Here, it is story magic, things that seem to unreal to be true.
